

Manzil Consultancy — Case Workflow

How a client's visa application moves through the system, who handles each step, and the rules that keep the process in order.

1. The teams

Each operational role only sees and acts on the part of the process it owns (separation of duties). Managers and admins can act across all stages.

Role	Responsibility
Appointment Team	Onboarding details, advance payment, securing the appointment
File Team	Collecting remaining info, arranging travel, preparing documents
Accountant	Invoices, recording dues status, completing the case
HR Manager / Admin / Super Admin	Oversight — can act on every stage

2. The flow at a glance

The same flow as a Mermaid diagram (renders on GitHub / Markdown viewers):

```

flowchart LR
    A([INTAKE\nOnboarding]) -->|advance paid| B([APPOINTMENT])
    B -->|appointment secured| C([FILE PROCESSING])
    C -->|file ready| D([INVOICED])
    D -->|all dues paid| E([COMPLETED])

    A -. pause .-> H([ON HOLD])
    H -. resume .-> A
    A -. cancel .-> X([CANCELLED])
    B -. cancel .-> X
    C -. cancel .-> X
    D -. cancel .-> X

    classDef done fill:#dcfce7,stroke:#16a34a;
    classDef hold fill:#fef3c7,stroke:#d97706;
    classDef stop fill:#fee2e2,stroke:#dc2626;
    class E done;
    class H hold;
    class X stop;

```

A case always moves **one stage forward at a time** — stages can never be skipped.

3. Step by step

Stage 1 — Intake (Onboarding) · Appointment Team

The client is onboarded with their essential details:

- Passport number, full name, date of birth
- Destination country and preferred appointment city
- Service charges and the **advance amount**

The advance payment is recorded and marked **Paid / Unpaid**. An **Advance Receipt** (PDF) can be downloaded once it is marked Paid.

➡ **Gate:** the case cannot leave Intake until the advance is marked **Paid**.

The client may **pause** the process at this step (e.g. they are travelling or undecided). A paused case is put **On Hold** and cannot advance until it is resumed.

Stage 2 — Appointment · Appointment Team

The Appointment Team works to secure the visa appointment and records:

- Appointment date, FRA number, TLS account, notes
- The client may still change destination country or city at this point

The case is **assigned to an Appointment Team member** so ownership is clear.

➡ Once the appointment is secured, the case advances to File Processing.

Stage 3 — File Processing · File Team

The case is **assigned to a File Team member**, who collects the remaining information and prepares the file:

- Current address, marital status, email

- Travel history and previous Schengen visa details
- Arranging flight tickets, hotel reservation, travel insurance
- Document checklist: appointment docs, ticket, insurance, hotel, e-visa, SOP, visa form

➔ When the file is ready, the case advances to Invoiced.

Stage 4 — Invoiced · Accountant

The Accountant raises one or more **invoices** for the case. Payment itself is handled **manually outside the system** — here we only track each invoice's **status** (Draft → Sent → Partial → Paid). An **Invoice Receipt** (PDF) can be downloaded for any invoice.

➔ **Gate:** the case cannot be completed until **every invoice is marked Paid**.

Stage 5 — Completed · Accountant

With all dues cleared, the Accountant marks the case **Completed**. The full file is ready to be shared with the client.

4. The rules that keep it in order

Rule	What it enforces
No skipping	A case moves exactly one stage forward at a time
Advance gate	Intake → Appointment is blocked until the advance is marked Paid
Dues gate	Invoiced → Completed is blocked until all invoices are Paid
Pause	An On-Hold case cannot advance until it is resumed
Cancel	A case can be cancelled from any active stage (stops the workflow)
Terminal	Completed and Cancelled cases cannot change stage

These rules are enforced on the server, so they hold no matter who calls the API.

5. Who can move each stage

Each transition requires a specific permission, so only the right team can perform it.

Transition	Required permission	Performed by
Intake → Appointment	<code>appointments:write</code>	Appointment Team
Appointment → File Processing	<code>files:write</code>	File Team
File Processing → Invoiced	<code>files:write</code> or <code>invoices:write</code>	File Team / Accountant
Invoiced → Completed	<code>invoices:write</code>	Accountant
Any → Cancelled	<code>clients:write</code>	Manager / Admin

Managers, Admins and the Super Admin hold the relevant permissions and can act on every stage.

6. Documents (PDF)

Document	Where	Available when
Advance Receipt	Case → Onboarding section	Advance marked Paid
Invoice Receipt	Invoices list / Case → Invoices	Any invoice (switches to "Receipt" once Paid)
Client Profile	Client detail → Download PDF	Any time

7. Quick reference

Stages: INTAKE → APPOINTMENT → FILE_PROCESSING → INVOICED → COMPLETED (plus CANCELLED , and an On Hold pause flag)
